**NEW Hand Sanitizer for Your Health** The swine flu may be the most publicized health concern as of late, but it's certainly not the only reason to practice good hand sanitation. Germs abound in this modern world where everyone's on the go all the time, so arm yourself with Frais' eco-friendly and aromatherapeutic Hand Sanitizer (available in a pocket size that's oh so perfect for your purse). While killing 99.9% of germs, Frais moisturizes as it sanitizes, and it's made with eight essential oils. Unlike most hand sanitizers, its slightly sweet smell makes this a great mainstay for your home, handbag, or office. ([www.fraislux.com](http://www.fraislux.com)) - JS
