## Frais and Fabulous

I don't know about you but I can hardly remember life before hand sanitizers, although I'm certain having kids figures prominently in my desire for cleaner hands, what with new virii constantly circulating through my son's preschool. But, as much as we depend on them, conventional hand sanitizers aren't known for being very...natural. **Frais**, however, is one hand sanitizer that happens to be free of unnatural chemicals such as parabens, propylene glycol, petrochemicals, ethoxylates, silicones, phthalates, mineral oils, DEA, sodium lauryl sulfate or other sulfates, artificial colors and artificial

fragrances. Frais uses pure sugarcane alcohol and a blend of eight natural essential oils to kill 99.9% of harmful germs including influenza, the common cold, tuberculosis, bird flu, MRSA staph and many others. As if that weren't enough, Frais is also dermatologist-approved and cruelty-free and it's *my* new first choice for *all* the gemy hands in our family!
