FRAIS

Now days, regular hand washing and sanitizing is an absolute must. The World Health Organization, Centers for Disease Control and the Mayo Clinic attest that this concentration of ethyl alcohol kills 99.9% of germs encountered in everyday life including influenza, the common cold, tuberculosis, bird flu, MRSA staph, swine flu, and many others. But using more toxic sanitizers over non-toxic and eco-friendly versions doesn't necessarily mean you're killing more germs.

Frais is an Australian company who creates eco-friendly, luxurious and aromatherapeutic all natural, vegan hand sanitizer that kills 99.9% of germs without the traditional chemicals found in other hand sanitizers. Frais' high grade sugarcane alcohol and moisturizing essential oils make it possible to stay safe from germs throughout the day without drying the hands from using chemicals. Frais is completely **plant based**!!

I don't know about you, but I really dislike hand sanitizers because of their scent and how drying they are. Even when they're scented to smell like Cucumber Melon, they still reek of alcohol and chemicals. Frais is made with alcohol from sugarcane rather than from cheap, harsh everyday rubbing alcohol like other brands use. Sugarcane alcohol takes far less energy to produce and sugarcane is a renewable resource. To leave your hands smelling great, Frais uses a blend of 8 essential oils including cardamom, grapefruit, niaouli, and basil. The ginger and tangerine scent is completely divine and unique. It's a fresh change from other hand sanitizers!

I keep my full sized Frais in my son's room for after diaper changes and have a bunch of mini sizes in my purse and by the door. I'm super sensitive to anything scented whether it's natural or artificial...if my nose doesn't like it I get an instant headache or migraine. I have no worries about using Frais around my little guy because it's not an overbearing scented product. I even use it on his hands when we're out and about and don't have the option to handwash.

I would love to see Frais create a spray sanitizer as well (the same product, only in a little spray bottle) so that I could sanitize shopping carts when we don't have our shopping cart cover or surfaces that you want to be sure are clean - like a restaurant table for instance.

This is a product I would recommend to anyone. The packaging is pretty enough to sit in a spa or on the bathroom vanity. There are no artificial ingredients, all packaging is recyclable, the company itself uses wind and solar energy to power their headquarters, and part of Frais' proceeds go to **Just A Drop Foundation** providing clean water in the developing world!

{ the giveaway }

1 reader is going to receive a full set of Frais products valued at \$39.50!

{ to enter }

- Check out the [Frais Ingredients](#) page and tell me something you learned!
- If you don't blog, you can still enter! Just make sure you leave me your email address with your comment.
