Hand Sanitizer - A Must

 BEAUTY BLOG: [HANDS AND FEET](#)

With all the viruses going around these days, the scare of the H1N1, colds and germs having a hand sanitizer with you at all times is a must. It is even more of a must if you have kids. Keeping the germs from taking over our lives is huge right now. I recently received my fall **Beautyfix Bag** and it was filled with a great hand sanitizer from [Frais](#).

Frais Pocket Hand Sanitizer is a great little product. It works well and smells wonderful. It does not leave your hands smelling like you just applied hand sanitizer since it has ginger, tangerine, lemon myrtle, niaouli, orange, basil, grapefruit and cardamon in it. The only down fall of the product is how small it is. This pocket hand sanitizer would last less than a day at my house. I would need a larger bottle, like the **Frais Everyday**. But I do recommend this product not only for its smell but because it is not tested on animals and comes at a

great price, \$3.50.

Here is what **Frais** says about their product: ***Frais Pocket** was designed to be taken on the run with keys, mobile phones and purses or wallets. Feel protected everywhere you travel with a naturally moisturizing eco-friendly hand sanitizer. A chic, cute, and convenient portable pocket size for everyone in the family.*
